WONG KIN HOW

SENIOR FRONTEND DEVELOPER · NEXT.JS · TYPESCRIPT · AI AGENTIC CODING FOR TEAMS

kinhowwong@gmail.com · +60 16-270 6926 · Kuala Lumpur, Malaysia · Case study: kinhow.github.io/ai-workflow

Senior frontend developer with 10 years in frontend, 8 of them with **React**. Makes **AI agentic coding reliable for engineering teams**: built the workflow and Claude Code plugins that 8 engineers use, with **34 production releases since July 2026 and 1 revert**. Led the move of a legacy Next.js 9 + Redux app to **Next.js 16 App Router**.

WORK EXPERIENCE

Mudah.my

Software Engineer 2 (Frontend) 2023 — PRESENT

TECH *Next.js 16 · React 19 + Compiler · TypeScript · TanStack Query · Zustand · Mantine · Tailwind CSS · Jest + RTL · Sentry · Claude Code*

- Owned the auto-web app through **67 production releases since 2024, with 1 revert**. Led its 3 – 4 engineers, set the coding standards and lint gates, and reviewed teammate pull requests.
- Built the **AI agentic coding workflow** for the team: PRD with business rules, spec, tickets, test-first code, AI code review, then a human merge. **8 engineers** use it, with **34 production releases and 1 revert** since July 2026.
- Moved the **Auto listing page** from a legacy Next.js 9 + Redux repo to **Next.js 16 App Router**. Replaced Redux with **Zustand** for client state and **TanStack Query** for server state.
- Designed and led a **Claude Code plugin marketplace (7 plugins, 18 skills)** for **5 product repos**. It checks each spec against **113 business rules** that product teams own, before anyone writes code, and extends an open-source skills workflow.
- Gated plugin releases with a CI check, Changesets versions, and an **eval suite** that compares results with and without each plugin, so a plugin ships only if it improves the output.
- Adopted Server Components, streaming SSR, and React 19 + React Compiler. Built listing-page **SEO** (structured data, canonical tags) and **A/B tests** with the SEO and analytics teams.
- Built the **Auto landing page** and rebuilt the **ad-view page**, and defined the folder structure and frontend docs.

Software Engineer (Frontend) 2020 — 2022

TECH *Next.js · TypeScript · Tailwind CSS · Material UI · Jest · Storybook · Rollup*

- Shipped the **Trustap escrow payment integration** from end to end, the first secure payment flow on Mudah.
- Built a **dynamic mobile filter system**, and email templates that render correctly in iOS Mail, Gmail, and Outlook.
- Maintained the shared **UI component library** that all Mudah verticals use.

Asia Fusion Technology Ltd

Software Engineer (Frontend) 2018 — 2020

- Built **React** single-page apps, with shared components and libraries, from product and design specs.

fourtitude.asia

Frontend Developer (client: 11street) 2016 — 2018

- Built campaign pages for 11street with HTML, SCSS, and jQuery, and wrote reusable SCSS that cut repeated work.

SKILLS

Languages & Frameworks: HTML, CSS, JavaScript, TypeScript, React, Next.js (App Router)
State, Styling & Testing: Zustand, TanStack Query, Tailwind CSS, Mantine UI, Jest, React Testing Library
Tooling & Design: ESLint, Prettier, Turbopack, Storybook, Sentry, Google Tag Manager, Figma
AI tooling: Claude Code, plugin and skill authoring, hooks, MCP, eval suites

LANGUAGES AND EDUCATION

Languages: English, Chinese (Mandarin), Cantonese, Bahasa Melayu
Education: PJ College of Art & Design, Interactive Multimedia & Animation Design
